

Warden Celevon Edraven Erinos (Jedi)/Wildcards, House Hoth of COU
PIN:12004

Possession I

Name: Shaving Blade
Type: Weapon (Bladed)
Category: Dagger

Description: This curved dagger is of a deceptively simple design, featuring a four-inch durasteel blade and a leather-wrapped wooden handle that is only slightly longer, making it perfect for concealment. Though the main use of the razor-sharp blade is to keep the heads of the LF Zealots shaved smooth, it serves as a backup weapon. Whether it is used against enemies that get too close or on themselves should they be captured is up to the individual.

Possession II

Name: Nano-droid Injector
Type: Medical/Technology
Category: See Above

Description: This injector is full of thousands of microscopic nano-droids that can be injected directly into the bloodstream of the LF Zealots. Due to the inherently unstable nature of the microscopic droids (a certain frequency triggers the explosives), the individual in question is fully aware that they have a limited window of time to get where they want to be for the detonation. It requires very little medical knowledge, as it automatically injects its contents when the button at the base is depressed and the needle side is jabbed into the skin.

Possession III

Name: Nano-droid Trigger
Type: Equipment
Category: Electronics

Description: This trigger or detonator switch is of a very simple and compact design. Though only a few inches in length, it bears three buttons (0, 15 & 30 seconds) along the 'handle' and a red button on top. Once the time is selected and the red button pressed, the device releases a subsonic frequency that triggers the explosive nano-droids.
